

With a perfect dose of surroundings presented in the house from the large floor to ceiling windows and framing, this home reinforces its surroundings, giving off the feeling that it's a natural progression of the landscape. An open living area with kitchen, dining room, living room and study nook all blend into one great space. Featuring a carport/ optional garage, large wooden deck, one master and two bedrooms, this design is not only a work of art but a functional home.

Floor Area: 179m<sup>2</sup>
